The watertight pressed worktop is in 2 mm AISI 304 stainless steel. The fast-heating hot plates with safety device to prevent overheating, made in cast iron 300x300 mm, are watertight fixed to the worktop and are powered by 3 kW and 4 kW heating elements with 6 (+1) positions thermostat for optimized power control. Indicator lights show when each hotplate is in operation. Rounded corners and a moulded recess trap prevent overflowing, ensuring also easier cleaning. Versions with GN 2/1 static oven (electric heating): stainless steel double-wall cooking chamber with enameled bottom (optional cast iron bottom), stainless steel double-wall door with insulating casing. The electric oven has 6.2 kW stainless steel armoured heating elements placed on the bottom and on the top of the cooking chamber; thermostatic temperature control with separate bottom/ top temperature control for maximum cooking flexibility.
